

COVID-19 Update for UK Employees | 14/08/2020

Update on Travel Following Increased Quarantine Measures

As confirmed cases of Coronavirus increase across Europe, the UK Government has announced that France, Malta and the Netherlands have been removed from the list of countries that are covered by the travel corridor exemption.

Additionally, Aruba, Monaco and the Turks and Caicos Islands have also been removed.

This means that all those returning to the UK from these countries after 4am tomorrow, Saturday 15th August, will need to self-isolate for 14 days, and provide their journey and contact details via the [government website](#).

Additionally, the Foreign & Commonwealth Office has updated its travel advice and is currently **advising against all non-essential travel to these locations, based on the current assessment of COVID-19 risks.**

- **We would strongly recommend all employees check the Foreign & Commonwealth Office guidance for any countries you are considering travelling to before booking any trips.** Be aware that their advice can have an impact on the validity of any travel insurance you purchase.
- It is also important that people are aware of which countries are covered by the travel corridor exemptions – the updated list can be found [here](#) – and appreciate that this can be subject to change. If you visit a country that is not on the list, you **must** self-isolate for 14 days on return.
- If you have any travel plans or a holiday you have booked to an area that may be subject to quarantine restrictions, please ensure you speak with your line manager who will seek guidance from HR.

CEMEX UK will continue to follow Government guidance and will update you on any further changes that may impact your work and the way we operate.

We hope all our employees have a good and restful weekend. Please continue to take the necessary precautions and follow our four behaviours, to keep yourself and your family safe.
